## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I:** claim(s) 1-13, 19, 25-36, 44, 64-65, 67-68, drawn to a temperature adjustment for the substrate-holding member and member forming a flat portion around the substrate, classified in class 355, subclass 53.

**Group II:** claim(s) 14-18, 20-24, 62-63 and 66, drawn to a temperature adjustment for the optical member, classified in class 359, subclass 820.

**Group III:** claim(s) 37-43, 59-61 and 69, drawn to a temperature adjustment for the liquid, classified in class 355, subclass 30.

**Group IV:** claim(s) 45-58, drawn to a temperature adjustment for an object and a substrate, classified in class 355, subclass 77.

2. The inventions listed as Groups I - IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group is drawn to a temperature adjustment system applied to a different material type such as liquid, optical material or lens, support material which is solid.

3. Upon Applicant electing the invention directed to Group I above, the Group I contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

**A:** Embodiment directed to temperature adjustment for substrate holding member (claim(s) 1-13, 19, 36 and 44).

**B:** Embodiment directed to temperature adjustment for member forming the flat portion (claim(s) 25-29, 64 and 67).

**C:** Embodiment directed to temperature adjustment for the first and second substrate stage (claim(s) 30-35, 65 and 68).

**D:** Embodiment directed to temperature adjustment for the substrate (claim(s) 45-54).

**E:** Embodiment directed to temperature adjustment for an object (claim(s) 55-58).

**F:** Embodiment directed to temperature adjustment for the liquid (claim(s) 59-61).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 2851

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Please see the specified explanation for each species above.

The following claim(s) are generic: no claim is generic.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each group is drawn to a temperature adjustment system and method for a particularly different element in the projection apparatus.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
